PROFESSIONAL SUMMARY

Entry-level Frontend Developer with hands-on experience building and deploying responsive web applications using React.js, JavaScript, HTML5, and CSS3. Built and deployed five practical projects including an E-commerce App, Expense Tracker, Weather App, Notes App, and To-Do App. Experienced with React Router, REST API integration, Fetch API, Local Storage, React Hooks, reusable components, state management, asynchronous JavaScript, and responsive web design. Seeking a Frontend Developer or React.js Developer role.

CORE SKILLS

HTML5 • CSS3 • JavaScript • React.js • Responsive Web Design • Git & GitHub

TECHNICAL SKILLS

React: React Router, useState, useEffect, JSX, Props, Reusable Components

APIs & Data: REST API Integration, Fetch API, JSON, Async/Await, Promises, Local Storage

Development: State Management, Event Handling, Form Handling, Error Handling, Debugging

Tools: VS Code, Netlify, Vercel

PROJECTS

E-commerce App

A responsive e-commerce app built with React. This frontend project includes product listing, search, category filtering, sorting, favorites, cart management, React Router navigation, and API integration.

- Built reusable ProductCard and ProductList components for displaying product data.
- Managed shared product, favorite, and cart state and created responsive layouts for different screen sizes.

Technologies: React.js • React Router • REST API • Fetch API • Local Storage • CSS

Expense Tracker App

A modern Expense Tracker App built using React.js. Users can add, edit, delete, and manage income and expense transactions with automatic balance calculation and Local Storage support.

- Implemented transaction add, edit, delete, and management functionality with automatic balance calculation.
- Used Local Storage to persist transaction data between browser sessions.

Technologies: React.js • JavaScript • Local Storage • CSS

Weather App

A weather application built using React.js and a Weather API to retrieve and display city-based weather information.

- Integrated a public Weather API with Fetch API to retrieve weather data from user search input.
- Handled asynchronous API responses and updated the React UI with returned weather information.

Technologies: React.js • REST API • Fetch API • Async/Await • CSS

Notes App

A Notes application built using React.js and Local Storage for creating, editing, and managing saved notes.

- Implemented note creation and management using React state.
- Used Local Storage to persist saved notes across page refreshes.

Technologies: React.js • JavaScript • Local Storage • CSS

To-Do App

A task management application built using React.js and Local Storage. Users can add, edit, delete, and manage daily tasks.

- Implemented add, edit, delete, and task-management functionality using React state.
- Persisted tasks with Local Storage so saved tasks remain available after refresh.

Technologies: React.js • JavaScript • Local Storage • CSS
